

***Remarks***

The amendments above clarify, without narrowing the scope of the originally filed claims. The pending claims stand rejected over Klinger, which discloses and teaches an integral arching pressure member with cut outs. The present limitations clarify the original scope by additionally reciting the structural distinction between the weight distribution surface claimed in the seat cushion environment of the invention.

Prompt and favorable consideration of this Amendment is respectfully requested.

Respectfully submitted,

By: Robert C. Haldiman, Reg. No. 45,437
